

Harness the power of the iPhone + SBS

All of our small business servers are built using **Microsoft Small Business Server (SBS)** software running on rock-solid hardware servers from **Dell**. Allow us to help you:

- Establish a solid and reliable network foundation
- Centralize and back up important business data
- Share email, contacts and calendars
- Easily access your office desktop remotely
- Easily share files and printers

Don't let technology be an obstacle - ***make it work for you!***

Seamlessly integrate your **iPhone** with your own **Microsoft Small Business Server (SBS)** based company network

- Send and receive business email
- Synchronize Outlook calendar items and Outlook contacts
- View Word, Excel and PowerPoint files

All of this is done wirelessly in real-time while you are away from the office!
